

Standardised documentation captures every diagnostic dimension. Complete all seven views before treatment.

Use consistent lighting, distance (30cm for close, 60cm for mid, 120cm for full), and neutral background.

VIEW 1: FRONTAL

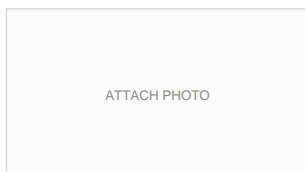

ANGLE: Full face, straight on

CAPTURES: Hairline position, symmetry, frontal density
facial proportion reference

NOTES: _____

VIEW 2: LEFT PROFILE

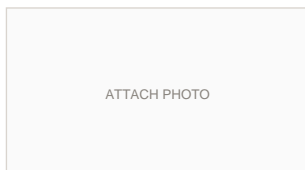

ANGLE: Left side, 90°

CAPTURES: Left temple architecture, parietal ridge, left recession pattern

NOTES: _____

VIEW 3: RIGHT PROFILE

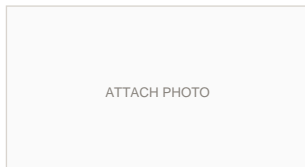

ANGLE: Right side, 90°

CAPTURES: Right temple architecture, parietal ridge, right recession pattern

NOTES: _____

VIEW 4: LEFT 3/4

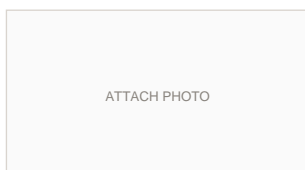

ANGLE: Left side, 45°

CAPTURES: Left hairline transition, temple-to-frontal blend, asymmetry check

NOTES: _____

VIEW 5: RIGHT 3/4

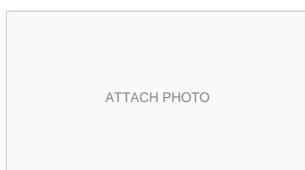

ANGLE: Right side, 45°

CAPTURES: Right hairline transition, temple-to-frontal blend, asymmetry check

NOTES: _____

VIEW 6: CROWN / TOP-DOWN

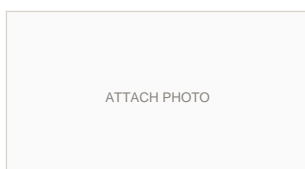

ANGLE: Directly above, crown visible

CAPTURES: Crown whorl, vertex density, overall density distribution
coverage mapping

NOTES: _____

VIEW 7: OCCIPITAL

ANGLE: Back of head

CAPTURES: Neckline, occipital bone profile, donor area (if FUT/FUE)
posterior density

NOTES: _____
